Lasscock's

TO OUR MANY FRIENDS

Once again we have pleasure in sending you a copy of our new Catalogue, which is more comprehensive than others we have formerly sent out. We trust that its perusal will be interesting and helpful to all who take an interest in gardens and gardening.

Our extensive Nurseries, which had their beginning in 1906, now occupy 20 acres, where many thousands of Roses, Fruit and other trees and shrubs, etc., are grown in the open to supply customers' requirements.

Numerous glasshouses, shadehouses, stovehouses, and frames are well filled with healthy and vigorous ornamental trees, flowering shrubs, ferns, and other plants for delivery to the homes of thousands of customers.

We believe that our slogan, "Lasscock's for Quality," has been proved to be truthful by all who have entrusted their orders to us, and that our reputation for growing and supplying only the very best has been maintained.

We direct attention to our Seed Department, which supplies only the best quality Seeds of dependable strains in both the Flower and Vegetable sections.

Our Seedling Department, which supplies the needs of the busy folk, who have little or no time for seedling raising, has grown to a considerable extent during recent years, and may always be relied upon to supply requirements for seasonable Seedlings of popular varieties. Customers can rely upon receiving sturdy, hardy plants, fresh from the nursery beds, which will quickly forge ahead when planted out. Only the best strains are grown; cheap seeds are not supplied or sown at our Nurseries.

Our Floral Department supplies, at most reasonable prices, all requirements for Weddings, as well as posies, bouquets, and other floral designs for all occasions. Wreaths for Funeral requirements are also skilfully designed in any desired colour scheme, and are delivered on the shortest notice.

Choice Fresh Cut Flowers are obtainable from us for all occasions at most reasonable rates.

We take this opportunity of thanking our Customers for past support, and assure them of our very best attention to all future commands.

We desire to please. No order is too small, and none is too large to receive our prompt and very best personal attention.

TERMS OF BUSINESS

Orders.—To facilitate speedy delivery, Customers are requested to write their Orders on a separate sheet of paper, stating their name and address. This Order should be quite separate from any letter sent with an order.

Orders can be booked at any time for forward delivery at the proper season for planting. Our best attention and prompt dispatch can be depended upon.

Selection of Varieties.—When special varieties, such as Roses, are ordered, we would appreciate a list giving a second choice. This is desirable unless the choice of varieties is left to us.

Packing.—Every attention is given to careful packing, so that no damage may be done in transit. A charge is made only for the actual cost of cases and packing material used.

Remittance is requested with Orders from unknown Customers, or a satisfactory Adelaide reference should be given.

Payment may be made by crossed cheque, postal note, or post office order, made payable to Lasscock's Nurseries Ltd., Adelaide, South Australia. Small amounts may be remitted in penny or twopenny stamps.

Conditions of Sale and Liability.—As customary in the trade, we wish it to be understood that great care is taken to supply everything true to name and of good quality, but without guarantee or warranty, expressed or implied, as to description, quality, productiveness, or any other matter connected with the goods we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must be returned at once, carriage paid.

LASSCOCK'S NURSERIES LTD.

Ask us for anything you may require for your Garden.
If it is not catalogued, we will endeavour to procure it
for you.

All Classes of Artificial Manures in Stock.

- Mrs. Sam McGredy (H.T.).**—Coppery apricot to Lincoln red to old gold and salmon.
- Mrs. W. C. Miller (H.T.).**—Soft pearly blush, shaded salmon, outside of petals vermilion rose.
- Mrs. W. E. Lenon (H.T.).**—Reddish carmine, long pointed buds, fragrant; free-flowering.
- Oliver Mee (H.T.).**—Deep salmon pink; flushed fawn.
- Ophelia (H.T.).**—Salmon flesh, perfect form; sweetly scented.
- Patience (H.T.).**—Bud scarlet carmine lake, opening to orange and carmine pink.
- Peggy Bell (H.T.).**—Inside petals salmon-pink to carmine, reverse glowing carmine with copper sheen; very free-flowering.
- Phoebe (H.T.).**—Creamy white, long buds.
- Pilgrim (H.T.).**—Silvery-pink, outside of petals clear rose-pink.
- Portadown Fragrance (H.T.).**—Orange salmon, flushed with scarlet.
- President Herbert Hoover (H.T.).**—Beautifully-formed flowers of cerise, bronze, and yellow.
- President Jac. Smits (H.T.).**—Scarlet crimson, holds well; strong, upright growth.
- Prince Charming.**—Deep reddish copper, with old gold base; beautiful.
- Radiance (H.T.).**—Brilliant carmine.
- Rapture (H.T.).**—Sport of Madame Butterfly; somewhat deeper pink.
- Red Letter Day (H.T.).**—Semi-double, brilliant, and velvety scarlet crimson buds.
- Red Radiance (H.T.).**—Brilliant cerise red. A sport from Radiance.
- Rev. R. Page Roberts (H.T.).**—Beautiful rich yellow like "Marechal Neil," with buff markings on reverse of petal.
- Rhea Reed (H.T.).**—Bright red, free-flowering, on long shoots.
- Romance (H.T.).**—Buds long-pointed; flower golden-yellow, shading to lemon. Very large double flowers; good foliage and strong growth.
- Roselandia (H.T.).**—A sport from Golden Ophelia, much deeper in colour; perfect form.
- Rose Marie (H.T.).**—Rose pink; long, perfect buds and full flowers.
- Safrano (T.).**—Deep apricot, changing to buff.
- Sensation (H.T.).**—Scarlet crimson, maroon markings, large double; buds large and long-pointed.
- Severine (H.T.).**—Bright cherry cerise, overlaid with salmon.
- Shot Silk (H.T.).**—Orange, flushed rose; clear yellow base; superb.
- Sou. de H. A. Verschuren (H.T.).**—Cadmium yellow to deep yellow on opening; large and full.
- Souvenir (H.T.).**—Deep golden, sport of Talisman; extra fine.
- Souvenir de Claudius Pernet.**—Sunflower yellow; does not bleach with the sun.
- Souvenir de Georges Pernet.**—Orient red, ends of petals cochineal carmine; very good.
- Souvenir de Stella Gray (T.).**—Deep orange, with splashes of apricot, salmon, and carmine.
- Sovereign (Per.).**—Deep yellow in bud, opening to deep golden yellow.
- Sunburst (H.T.).**—Orange yellow, deeper centre; fine long-pointed buds.
- Sunny South (H.T.).**—Pink, flushed carmine, on yellow base.
- Sunstar (H.T.).**—Deep orange and yellow edge, veined and splashed crimson and vermilion.
- Talisman (H.T.).**—A very fine and attractive rose; colour, scarlet, pink, copper, and gold are all to be found in the glorious shadings. The most outstanding variety introduced for some years.
- The Bride (T.).**—White, tinged with rose; a good garden rose.
- The Queen Alexandra (H.T.).**—Vermilion shaded old gold.
- Warrior (H.T.).**—Long buds, blood-red, opening to vivid scarlet crimson.
- W. E. Chaplin (H.T.).**—Carmine-crimson; good form; strong growth.
- White Ensign (H.T.).**—Colour white, flushed delicate cream.
- White Maman Cochet (T.S.).**—White, flushed cream at base of petals; medium size; ideal for garden and bedding.
- William Orr (H.T.).**—Deep velvety crimson, with a delightful sheen.

Dwarf Polyantha Roses

Polyanthus, or bunch-flowered roses, deserve attention. In most gardens featuring roses some of the climbing polyanthus varieties, such as "Dorothy Perkins" and the like, are included; but more prominence might be given to the varieties known as the Dwarf Polyantha, or, as some call them, poly-poms. These little gems were originated by crossing the climbing Polyanthus with the tea rose, and some most desirable varieties have resulted. "Cecile Brunner," a great favourite for bouquet-making, may be instanced. "Orleans" is another that has become popular; but the gem of them all is that recently introduced in "Goldlachs," or Golden Salmon, as it is also called.

The Dwarf Polyantha Roses are splendid for bedding or for bordering. In beds, groups of one colour, or mixed colours may be grown, but for bordering it is better to confine the planting to one variety, or at least to varieties of similar habit of growth. These roses provide a continuous display of bloom. They may be allowed to make fairly large bushes, or kept dwarfed by hand pruning, which, of course, is the best plan when they are grown as edgings.

Borderer.—Pink shaded copper and amber; very free-flowering.

Cecile Brunner.—Blush, centre salmon pink. A favourite buttonhole rose.

Coral Cluster.—Rich coral pink; very pretty and distinct. A fine addition to this class.

Gloria Mundi.—The most startling outstanding novelty in the Polyantha class ever introduced. Its colour is a clear glowing orange; flowers fully double, and borne in clusters. Our stock of this novelty is over 1,500 plants, and the glorious display when in flower make this new variety stand out above all surrounding roses. It has already gained two Gold Medals and a Silver Cup. Where a glorious border or massed bed is required, no rose can compete with this charming variety.

Golden Salmon (Goldlachs).—This dwarf Polyantha Rose, of recent introduction, is a gem among Polyantha Roses, and its colour, an intense fiery golden salmon, is quite unlike any other rose. The medium to large-sized flowers are produced in large full trusses, and its strong bushy growth of medium height makes it a delightful variety for massing in beds or borders. The foliage is fine and healthy. Highly recommended.

Ellen Poulsen.—Dark brilliant pink; free flowering and very pretty.

Ideal.—Beautiful dark scarlet; said to be finest dark red Polyantha yet introduced. Fine for bedding.

Maman Turbat.—China rose, shaded clear peach, after style of "Orleans," but much prettier as a border rose. Compact grower.

Merville des Rouges.—A beautiful deep crimson; very dwarf. A fine variety for rose edging.

Miss Edith Cavell.—Scarlet-crimson sport from Orleans, possessing all the parent's good qualities; a fine clear colour; a rose that promises well.

Orange Queen.—This new Polyantha is a fixed sport of the well-known Orleans rose. Colour quite unique in Polyanthas, refined orange-salmon, and does not discolour.

Orleans Rose.—Brilliant rosy carmine, with white centre, semi-double. Fine for bedding, or for an edging. Always in flower.

Paul Crampel.—Deep orange scarlet.

Perle d'Or.—Nankeen yellow, with orange centre. Small and full flower; fine for buttonholes.

Rufus.—Pure intense crimson; flowers double, produced on bold, upright trusses. Pure self colour, does not burn.

Tip Top.—Orange yellow, shaded carmine. One of the prettiest of the Polyantha class. Makes a fine rose edging. Always in bloom.

White Orleans.—Similar to Orleans in all respects, except colour.

Lasscock's Seedlings Always Give Satisfaction.

Beautiful Climbing Roses

- American Pillar (P.).**—A fine Rambler, giving clusters of single pink flowers.
- Banksian Double White.**
- Banksian Double Yellow.**
Both varieties are excellent for covering pergolas and the like.
- Bardou Job (H.T.).**—A fine pillar rose; bright crimson, shaded black.
- Beauty of Glazenwood (Fortune's Yellow), (T.).**—Yellow, shaded bronze.
- Black Boy.**—Deep crimson, shaded blackish maroon, sweet scented.
- Climbing Belle Siebrecht (H.T.).**—A vigorous form of the popular rosy pink rose.
- Climbing Caroline Testout (H.T.)**—Bright salmon pink, large and full.
- Climbing Cecil Brunner (P.).**—Delightful for buttonholes; blush, centre salmon pink.
- Climbing Chateau De Clos Vougeot (H.T.).**—The darkest crimson H.T. rose grown. Splendid.
- Climbing Daily Mail Scented (H.T.).**—One of the deepest crimson roses, strong grower. Recommended.
- Climbing Dame Edith Helen (H.T.).**—Extra strong climbing sport from the well known variety. Recommended.
- Climbing Etoile de Hollande.**—A very fine bright red climber of great merit.
- Climbing Frau Carl Druschki (H.P.).**—A vigorous sport of the well known white rose.
- Climbing General McArthur (H.T.).**—An excellent climbing sport of the popular sweet-scented crimson rose.
- Climbing Golden Emblem.**—This splendid climbing sport of the popular variety is a decided acquisition.
- Climbing Golden Ophelia (H.T.).**—A fine sport of the popular yellow rose; perfect flowers.
- Climbing Hadley (H.T.).**—An excellent sport of the popular fragrant crimson rose. Highly recommended.
- Climbing Hoosier Beauty.**—A vigorous climbing sport of the popular rich crimson variety; deliciously fragrant.
- Climbing Hugo Roller (T.).**—A moderately vigorous climbing sport of the dwarf variety. Colour creamy yellow flowers, which are suffused or edged with crimson.
- Climbing Lady Hillingdon (T.).**—Free flowering, long buds; deep orange yellow.
- Climbing Lord Charlemont (H.T.).**—A strong climbing sport from the well known variety one of the best clear crimsons. Recommended.
- Climbing Larent Carl (H.T.).**—An excellent sport of the brilliant velvety carmine rose.
- Climbing Lorraine Lee (H.T.).**—Too much cannot be said of this very fine climber, and should be in every garden.
- Climbing Les Angeles.**—Flame pink, toned with coral; first class.
- Climbing Madame Butterfly.**—A beautiful sport of this well-known variety. Colour, a blending of bright pink, apricot, and gold.
- Climbing Mabel Morse.**—Brilliant golden yellow colour and beautiful exhibition form.
- Climbing Madame Jules Grolez.**—A strong-growing sport of the popular satiny China rose.
- Climbing Madame Abel Chatenay (H.T.).**—The best pink climbing rose, a strong grower.
- Climbing Madame E. Herriot (H.T.).**—A strong climbing sport of the popular rose.
- Climbing Madame Second Weber (H.T.).**—An excellent strong-growing sport of the beautiful rosy salmon rose.
- Climbing Maman Cochet (T.).**—Flesh coloured rose, shaded carmine and salmon-yellow.
- Climbing Mrs. Aaron Ward.**—Indian yellow large and full; excellent.
- Climbing Mrs. Herbert Stevens (T.).**—A fine sport of the well-known white rose.
- Climbing Mrs. G. Sawyer.**—One of the best show pink roses.
- Climbing Ophelia (H.T.).**—Salmon-shaded rose perfect blooms; vigorous grower.
- Climbing Radiance (H.T.).**—Carmine pink blooms in profusion; sweetly scented.

- Climbing Red Radiance (H.T.)** — Cerise red; excellent under artificial light; fine in autumn and winter.
- Climbing Richmond (H.T.)**.—A true climber from the rose of the same name.
- Climbing Rose Marie (H.T.)**.—A decided acquisition; rose pink; long, perfect buds; growth vigorous and clean; highly recommended.
- Climbing Shot Silk (H.T.)**.—Another climbing sport of excellent quality, both in growth and flower.
- Climbing Sunburst (H.T.)**.—A valuable addition to the climbers; rich orange yellow.
- Climbing Sunstar**.—Deep orange and yellow, veined and splashed crimson and vermillion.
- Climbing Talisman (H.T.)**.—A climbing sport of the very popular dwarf variety. As in the dwarf form, scarlet, pink, copper, and gold are all to be found in the glorious shadings. Extra strong growth, and highly recommended.
- Climbing White Maman Cochet (T.)**.—A vigorous climbing sport of the popular rose.
- Cloth of Gold (N.)**.—Pale sulphur yellow, deeper centre; large and full; fine in warm districts.
- Countess of Stradbroke**.—This new, vigorous-growing, free - blooming rose raised by Mr. Alister Clark, gives large, full flowers of a rich dark velvety crimson sweetly perfumed.
- Crimson Rambler (P.)**.—Bright crimson cluster rose.
- Dorothy Perkins (W.)**.—A splendid shell pink cluster rose; strong habit and good foliage.
- Emily Gray (W.)**.—The finest yellow climbing Wichuriana rose yet introduced.
- Flying Colours (S.)**.—Large, single flowers of bright deep cerise.
- Fortuniana (Banksia)**. — Pure white (the Bridal Rose); foliage fine for covering.
- Golden Vision (T.)**.—Sweetly scented; golden yellow blooms.
- Gwen Nash (H.T.)**. — A first-class cyclamen pink climber.
- Harbinger (H.T.)**. — Large refined single pink flower.
- Hauff. (Mult.) (The Blue Rambler)**.—Bluish purple flowers, produced in cluster.
- Hiawatha (W.)**.—Fine vivid glowing crimson single flowers, with white eye, produced in long trailing bunches.
- Jessie Clark**.—A vigorous climber, producing large, single, pink flowers.
- Kitty Kininmonth (H.T.)**. — A brilliant climber; bright carmine rose; huge flowers, splendid foliage.
- Lady Gay (W.)**.—Flowers in rich rose-coloured clusters; glossy green foliage.
- Lady Waterlow (H.T.)**. — Pale salmon, edged with carmine; large semi-double one of the best climbers.
- La Marque (N.)**.—White, centre pale lemon; vigorous and free-flowering.
- Macartney Grandiflora (T.)**. — Large single white flowers; beautiful foliage.
- Madame Jules Gravereaux (T.)**. — Buff white, shade peach and yellow; a large, shapely rose; vigorous.
- Marechal Niel (N.)**.—A fine large bright golden yellow rose.
- Miss Marion Manifold (H.T.)**. — A vigorous climber; rich velvety crimson; a free and continuous bloomer; fine for arches, pergolas, etc.
- Nora Cunningham (H.T.)**. — Semi-double, cyclamen-pink rose; white zone at base.
- Paul's Scarlet Climber (Hybrid Wichuriana)**. — Vivid scarlet, shaded crimson; the finest colour of its kind; does not burn in the sun.
- Princess of Orange (Climbing Polyanthus)**.—This is climbing form of the popular Gloria Mundi. A very pretty climber of outstanding colour, being glowing orange, and double. We highly recommend this variety.
- Queen of Hearts (H.T.)**.—A splendid pink climber; free flowering.
- Ruby Ring (W.)**.—Splendid for pillars and hedges; flowers borne in elegant sprays; centre white, with ruby ring.

We Deliver to all Suburbs.

Informal, Formal and Outstanding Garden Designs

PLANS AND SPECIFICATIONS

We shall be pleased to quote for the full lay-out of gardens and pleasure-grounds, alterations to flower borders, modernising old gardens, laying down tennis courts, lawns, flower-beds, etc.

If your garden is not what it might be, consult us, we are ready to advise you how to improve it.

We are prepared to design, construct and plant formal, informal or rock gardens, and to give a firm quotation for the cost before the work is put in hand.

Every garden lay-out entrusted to us—whether a new one or an old one to be replanted—will be separately planned according to soil, aspect and requirements.

Rockery stones, paving and flagstones, screenings, soil, top-dressing, etc., supplied at shortest notice.

No charge for preliminary advice.

Scorcher (H.T.).—Crimson carmine, distinct in colour; attractive rich green foliage.

Sinica Anemone (Mac.).—A beautiful light silvery pink rose.

Souvenir de Leonie Viennot (T.).—One of the most beautiful climbers; silvery rose, shading to carmine; base of petals canary yellow.

FRUIT TREES

BRIEF NOTES ON PLANTING.

Preparation of the soil some time before planting gives best result. Digging all over the plot where it is intended to grow trees is far better than taking out holes here and there, which, if the subsoil is stiff and clayey, are likely to become water-logged in winter.

Remove the surface soil to a fair depth, and then break up the lower soil with a pick until a depth of from 14 to 18 inches in all is loosened. Into the lower soil some well-decayed manure, say, three or four good shovelful, and a sprinkling of bonedust may be well worked, but no manure must come into direct contact with the roots of the tree at planting.

It is always advisable to place a stake to each tree, to which the main stems should be tied. Fix the stake before planting the tree. The distance between each tree should be not less than 16 feet; 20 feet between each tree would be better. The soil marks showing on the tree as it comes from the nursery should be a guide to the depth to which it should be planted.

Firmly tread the soil around the roots at planting time, and give each tree a liberal watering.

Our stock of Fruit Trees this season are exceptionally strong, well-shaped, and rooted. Intending purchasers should inspect the Nurseries, Mellor Park, and see for themselves the fine lot of trees available.

PRICES.—Apples, Apricots, Almonds, Figs, Nectarines, Peaches, Pears, Plums, Prunes, and Quinces, 1s. 9d. each, 18s. per dozen assorted, £6 per 100. Ten or more of a sort, £5 per 100.

APPLES

Beauty of Bath.—Fruit medium size, roundish, beautifully striped and spotted with crimson in the sun; flesh yellowing, with a rich, spicy flavour. Summer.

Buncombe.—Medium size. Regular bearer; dessert. Late.

Cleopatra.—Medium to large, oblong to conical, skin clear yellow, flesh whitish, juicy and rich; good dessert quality.

Cox's Orange Pippin.—Very handsome, medium size, good export apples; grand dessert of excellent flavour. Does well in special district.

Delicious (Syn. Chicago).—Dark red fruit, strong, vigorous grower; great cropper, and bears regularly and early.

Dunn's Seedling.—Fruit large, clear waxen yellow, with brownish red cheek; a good, solid, late-keeping cooking apple; also useful for dessert. Largely grown for export. Winter.

Emperor Alexander.—Good cooking; fair dessert. Early Autumn.

Five Crown (London Pippin).—Fruit medium size, skin greenish yellow with brownish red cheek; good cooking or dessert. Does well in the cooler parts of the State.

Granny Smith.—A large and juicy apple of a greenish yellow colour, late, heavy bearer, and highly esteemed for export.

Gravenstein.—Large, roundish, rather flat; skin pale yellow, streaked red on sunny side.

Write plainly when Ordering.

Irish Peach—Medium size, roundish, rather flat and angular at the crown; skin yellowish green, streaked and spotted with brownish red.

Jonathan—An apple of great excellence; fruit medium size, roundish, conical, skin clear light yellow, almost covered with bright rich red, dark red where fully exposed; of fine dessert quality; an early bearer. Excellent for market or export. Winter.

King David—Colour dark red, with yellowish flesh; said to ripen before Jonathan. Tree hardy, vigorous grower; good cropper. Medium.

Ribstone Pippin—Medium size, greenish yellow, clouded with dull red on the sunny side; flesh yellow, with a rich aromatic flavour. Late autumn.

Rokewood—Heavy yielder, and one of the best keepers; good colour. Late.

Rome Beauty—Fruit large and handsome; skin yellow, shaded and striped with bright red; flesh yellowish, tender, and juicy. A remarkably handsome fruit of good dessert quality; good exporter. Winter.

Statesman—Fruit large, bright golden, striped and shaded crimson; a good keeper; very prolific. Winter.

Stone Pippin—Fruit large, greenish yellow tinted with dull red; a very solid and late-keeping variety; kitchen. Winter.

Strawberry Pippin—Fruit large, yellow and deep red; a very handsome apple; tree a very strong grower; the fruit will keep till August.

Tasma (Democrat)—A dark red all over; prolific bearer, good flavour, splendid keeper; dessert. Very late.

Yates—Good colour, trees very prolific; handsome dessert; requires plenty of moisture. Winter.

APRICOTS

Hemskirk — Fruit large, resembling "Moorpark," and ripening about the same time; a first-class variety.

Moorpark (Temple's)—Fruit large; skin yellowish green; brownish red on the sunny side; flesh bright orange, parts freely from the stone; the most popular variety for market, canning or drying. End of December and early January.

Newcastle Early—Medium size, rich golden yellow with a red cheek; a regular bearer, ripening before Oullin's"; requires to be heavily thinned. End of November.

Oullin's Early — A very heavy bearer. First week in December.

Riverside—Fruit large, roundish oval, of best quality. Middle December.

Riverside Late—Fruit large, with slightly flattened sides, flesh solid and good quality; a good bearer; ripening later than Robin's Imperial.

Robin's Imperial—Fruit medium to large, of good quality; does not commence to ripen till first week in January, a valuable late variety. January.

Royal — Medium, roundish oval; strong grower, and most prolific; largely grown for drying. Medium.

Tilton—Fruit very large, rich apricot colour. Late.

ALMONDS

Brandise—The tree is a strong, upright grower; nuts large and sweet; soft shell.

Californian Paper Shell — Tree of spreading habit, strong grower, a heavy and regular bearer of the paper shell type one of the best.

Chellaston—Tree extremely hardy, and great bearer; recommended as one of the best.

Commercial—Tree of very strong habit and distinct foliage, nut long and large, with a plump, sweet kernel, tree a regular and abundant bearer; soft shell.

Hatch's Nonpareil—A very fine almond, large kernel, and a very thin shell; the shell of this almond is the thinnest we know of, thus losing very little weight after being shelled.

I.X.L.—A good variety; large nuts, perfect shell. Shy bearer in some places.

Jordan True—A spread variety, bears large nuts. Hard shell.

Johnson's Prolific — We recommend this variety as the best commercial Almond in existence. It is a Soft-shell, a constant and heavy bearer giving good nuts of excellent flavour.

Ne Plus Ultra—Tree a rapid grower, and leaves are large. Produces nuts in bunches. Nuts large and long; fine flavour.

Paper Shell—Very good, easily broken between the fingers.

Peerless—It is without any doubt the prettiest dessert almond, being very smooth and well shaped, large and of fine flavour; shell easily broken between the fingers.

White Nonpareil — The tree is a strong grower, of spreading habit; nuts large; white shell; a far heavier bearer than the "Brandis."

CHERRIES

Price, 2/- each; 21/- dozen.

Belle d'Orleans—Tender and juicy; red. Early.

Bedford's Prolific—Large, handsome, black, fine market sort. Medium.

Bigarreau Napoleon—Large, bright, red colour, firm; good for canning. Late.

Bigarreau Twyford—Pale yellow and red; first-class quality. Early.

Black Bohemian — A large black cherry, first-class for market. Medium.

Early Lyons—Very early; black.

Florence—Large, bright red, carries well; one of the most popular varieties. Late.

Knight's Early Black—Richly flavoured, large, heavy bearer. Early.

St. Margaret—Very large, black, flesh firm, very valuable.

Werder's Early Black—Large, black, fine flavour; heavy cropper.

FIGS

Black Ischia—Large, sweet, and rich; skin deep purple.

Grosse Verte—Green; very large; rich and excellent. One of the best. Late.

Smyrna—The large drying fig of commerce; a splendid variety for growing in company with the Capri Fig. The Capri Fig should carry the wasp for purposes of cross fertilization to ensure the setting of the Smyrna Figs.

Turkey—Large, fine flavour, brown, with red flesh.

White Provence (White Genoa Sugar Fig)—One of the best. Ripe at Christmas.

LOQUATS

3s. 6d. each.

Chatsworth Victory — Fruit very large, with thick flesh; ripens late, and is of a very superior quality; the tree is a strong grower and good bearer, and is undoubtedly one of the best.

Early Oval—Fruit large, oval; a first-class loquat, and the earliest to ripen.

Enormity—The largest and finest loquat grown; very large fruit and good cropper.

Herd's Mammoth—Fruit nearly as large as "Chatsworth Victory," but ripening a little earlier; both varieties produce magnificent fruit if given good cultivation.

Large Round — Fruit very large, round, good quality; ripens very late.

MULBERRIES

Black English—Makes a very fine tree for shade; the fruit also is useful for dessert or cooking. 3s. 6d. each.

NECTARINES

Albert Victor — Fruit large; skin greenish white, with a carmine cheek; flesh greenish white, very juicy; ripe middle of January.

Early Rivers—Fruit very large; skin light yellow, marked with red in the shade, rich crimson in the sun. Early.

Goldmine—Fruit very large, roundish oval; colour bright bronzy red; a valuable late nectarine; ripening just before Stanwick. Late. The best all-round variety.

Irrewarra—Above medium, good colouring; nice flavour. Very early.

Cut Flowers always on hand.

Lee's Seedling—Fruit large and brilliantly coloured; very rich flavour; commences to bear very early, and is one of the best.

Lippeatt's Prolific—Fruit round, medium to large, dark red on greenish yellow ground. Flesh white. Prolific cropper.

Mrs. Dr. Chisholm—A medium-sized, high-coloured nectarine, very early, ripening with "Cardinal."

New Boy—Fruit large, skin creamy white, almost covered with brilliant crimson; flesh white, juicy and sugary, and good flavour. One of the best. Medium to late.

Rivers' Cardinal—Fruit good, medium size, brilliant colour, exquisite distinct flavour; the best early nectarine, ripens from ten to fourteen days before 'Early Rivers'. Very early.

Stanwick — Large, nicely flavoured. Late.

PEACHES

Anzac—Ripens before Hale's Early. A first class, highly coloured market variety of recent introduction. An acquisition to our Peach list. End December.

Alexander's Early—Above medium, highly coloured, splendid freestone. Early.

Brigg's Red May—Fruit large when well grown; skin whitish green in the shade; deep red in the sun; flesh tender, juicy, and rich; one of the very best early varieties. Very early.

Early Crawford—Very large, oblong; skin rich golden yellow, with deep red cheek; flesh yellow. Middle January.

Elberta—Fruit very large; skin a fine yellow, highly coloured with rich red; flesh firm, very fine-grained with an abundance of rich juice; undoubtedly one of the best and most profitable in cultivation for market purposes. End January.

Finlayson's Seedling—Fruit large, almost round, well coloured, and of first quality. Ripens with "Sea Eagle," and is one of the best late peaches. End of February.

Hale's Early—Fruit large, round; skin greenish white, nearly covered with dark rich red; flesh creamy white, juicy, melting and well-flavoured; a valuable peach, ripening just after the first early varieties. End of December.

High's Early Canada—Fruit large; skin yellowish white, with broken stripes and markings of crimson; flesh tender, rich, and melting; one of the handsomest and best of the very early varieties. December 10 to 20.

J. H. Hale ("The Million Dollar Peach"). — Larger than Elberta; round uniform shape. Colour rich golden yellow, overlaid with carmine. Flesh solid. Ripens five to seven days ahead of Elberta

Lady Palmerston—Medium to large, globular; skin greenish yellow, marbled, and flushed with deep red; flesh yellow, tender, and juicy; it never fails to bear a crop, and is one of the best for market, canning, or drying. February 20 to March 6.

Late Red Italian Cling—Fruit large and almost round, greenish skin, with a dark red cheek. Tree is a strong bearer.

Louis Grognet — Fruit very large; skin cream colour, with dark red cheek, often marked with red; flesh white, very melting and juicy; ripens just after "Hale's Early" and before "Mountain Rose."

Mountain Rose — Fruit large, skin whitish yellow in the shade, but covered with bright, rich red where exposed; flesh tender, melting, and rich; this is one of the best mid-season peaches. Second week in January.

Peregrine — Hardy and productive mid-season variety; large and handsome fruit; richly flavoured, and parting readily from the stone.

Phillips' Cling — Fine large yellow cling; the fruit is ideal for canning.

Pullars' Cling—A very large, highly coloured clingstone peach, and preferred for canning factories. It is a good grower and heavy bearer.

Royal George—Medium to large; skin pale yellowish white, almost covered with red in the sun; flesh tender, melting, and juicy; a well-known mid-season variety, and one of the best for home use. Middle or end of January.

Ruby Red—Large, skin creamy white, almost covered with brilliant red; flesh white; very juicy, and melting. Cling.

Salway—Medium size; juicy, fine flavour; yellow. Very late.

Sea Eagle—Fruit large; skin pale yellow, with a bright red cheek where exposed; a very heavy bearer and good market variety. Middle to end of February.

Sneed—Fruit medium size, oval; skin creamy white, with a delicate red cheek; ripens about ten days before "Red May."

Triumph—The earliest yellow flesh peach known; fruit large, round, almost covered with deep red; a valuable variety, ripening immediately after "Red May"; tree a strong, healthy grower, and prolific. Third week in December.

Tuscan's Cling—The earliest fine cling variety, ripening with Early Crawford, very large yellow fruit.

Wiggins—An early freestone of large size, and most highly coloured, ripening just after the first early sorts have finished; tree very hardy and prolific; valuable for market or home use. End of December.

A Remarkable New Fruit

The Peach Apricot—Both tree and fruit resemble the apricot in form, being quite as large as the variety Moor Park, and the trees fruit regularly every year. The fruit is of a cream colour, very thin skin, delicious flavour, having both peach and apricot flavours combined. The fruit makes a delightful jam. Price 2/6 each.

A Peach Ripening Calendar

Time of Ripening in Ordinary Seasons of some well-known varieties.

Dec. 1—Sneed.

Dec. 10—High's Early Canada.

Dec. 10—Briggs' Red May.

Dec. 14—Triumph.

Dec. 26—Wiggins.

Dec. 26—Anzac.

Jan. 1—Hale's Early.

Jan. 3—Ruby Red.

Jan. 5—Louis Grognet.

Jan. 14—Mountain Rose.

Jan. 15—Surecrop.

Jan. 18—Royal George.

Jan. 20—Peregrine.

Jan. 23—Early Crawford.

Jan. 23—Tuscan's Cling.

Jan. 25—J. H. Hale.

Jan. 30—Elberta.

Jan. 30—Elberta (Willow-laeved).

Feb. 16—Sea Eagle.

Feb. 16—Paragrove.

Feb. 16—Finlayson's Seedling.

Feb. 18—Lady Palmerston.

Mar. 18—Salway.

Apr. 5—Red Italian.

By reference to this list customers will be able to order and plant varieties to give fruit over a lengthy period.

DOUBLE - FLOWERING PEACHES

2s. each.

Crimson—Flowers very bright crimson.

Pink—Bright pink colour.

White—Flowers pure white.

Mellor Park Crimson—Extra early, flowering early in July.

PERSIMMONS

3/6 each.

The fruit of the Persimmon, when ripe, is of a deep reddish orange colour; shape like that of an orange. The flavour when perfectly ripe is most luscious. It is best kept for a time after being picked, and is then most delicious. The fruit ripens during winter, and is in consequence valuable for the table at a season when fruit is scarce. Leading sorts available.

PLUMS AND PRUNES

Angelina Burdett—Fruit above medium, roundish, dark purple, rich, juicy, and good for market or drying; the tree is a strong grower, and matured trees bear heavily. Early.

A Large Collection of Ferns to select from.

- Clyman**—Fruit large, skin dark purplish red when ripe. Very early.
- Coe's Golden Drop**—Large, oval, yellow, juicy, rich, and excellent; good drying, preserving, or dessert. Late.
- Diamond**—Fruit very large, oval, skin black, covered with blue bloom, flesh yellow; a good preserving variety; tree a very heavy bearer. Mid-season.
- Early Orleans**—Medium size, roundish oval, skin dark red, purple in the sun; good dessert or preserving; a first-class market variety. Early.
- Egg Plum**—Fruit very large, oval; skin yellow, covered with thin, white bloom; good cooking or preserving; a constant and heavy bearer. Late.
- Grand Duke**—Fruit large, oval, deep purple, flesh yellow, firm, very rich and juicy; a very heavy cropper, and one of the best late plums known.
- Greengage**—Fruit medium size, round, skin greenish yellow when fully ripe; one of the best-flavoured dessert plums known. January.
- Jefferson** — Fruit largest size, oval, skin yellow, with reddish cheeks where exposed to the sun; one of the most desirable of all dessert plums, and one of the best for preserving or drying. February.
- Kirk's**—A first-class variety, large and black. Medium.
- Pond's Seedling**—Fruit very large, oval, skin nearly covered with bright red or carmine; flesh yellow. February.
- Prune d'Agen**—Large purple; heavy bearer; the best prune grown. Medium.
- Prune Fellemberg (Italian)**—Another good drying and preserving prune. Medium.
- Prune, Splendour**—Fruit very large and sugary; a freestone; tree very productive, and a healthy and vigorous grower; ripens early for a prune.
- Prune, Sugar**—Tree very vigorous and productive; fruit extremely large, tender, rich, and very juicy; very early. Nearly 24 per cent. sugar.
- Prune, Tragedy**—Very large, purple; one of the finest early prunes.
- Robe de Sargeant**—Medium size, rich and delicious; one of the best.
- Rivers' Early Prolific**—Below medium, purple, very prolific; excellent preserving, good dessert; tree a very heavy bearer. December.
- Red Cherry (American)** — An early variety; small fruit. Good break-wind.

DAMSONS

- Cole's Prolific**—Good size for a damson; good quality and heavy bearer.
- Damson, King of the Damsons**—Tree very productive; fruit large and good. Medium.
- English**—Small, round, purple, good preserving; the tree is an enormous bearer, and the fruit will hang for weeks after it is ripe.
- Farleight Prolific**—Fruit large, rounded, enormous bearer.
- Shropshire**—The best for jam. Medium.

JAPANESE PLUMS

- Burbank**—Fruit large, round, red, with a lilac bloom, flesh yellow, very juicy, flavour excellent, tree strong grower and enormous cropper; one of the best Japanese; ripe early January.
- Climax**—The fruit is heart-shaped, larger than "Burbank," very highly coloured, and is ripe about a week before that variety. Early to medium.
- Kelsey**—A very large yellow and bright red plum; juicy and rich, very small stone; one of the best for canning and drying; carries well, heavy bearer.
- Rubio**—Very large, oval; crimson skin, very firm and fine quality flesh; strong grower and regular bearer. First-class Blood Plum.
- Santa Rosa**—Fruit very large and purplish crimson in colour; another excellent Blood Plum, and A1 for dessert; good strong grower.
- Satsuma (Blood Plum)**—Fruit large, round, dark red to the stone, which is small; ripens towards end of February, and will keep for a fortnight after being gathered.

Wickson — Fruit glowing carmine, with heavy white bloom, stone small, flesh of fine texture, sugary, and delicious; will keep for two weeks or more after ripening.

Wright's Early — Fruit resembles "Burbank" in size and appearance, but ripens much earlier; like "Burbank," it is an enormous bearer, and at present is the best early Japanese plum known.

PEARS

Bailey's Bergamotte—Very rich and melting fruit; a hardy grower and good bearer.

Clapp's Favourite—One of the best early varieties; before "Williams' Bon Chretien."

Dorondeau—Fruit large and handsome, regularly formed, skin shining as if varnished on the side next the sun, where it is of lovely crimson; on the shaded side it is almost covered with a thin coat of cinnamon russet; quality good; ripens March and April; tree an immense bearer.

Duchess—(See Williams' Bon Chretien).

Glou Morceau—Large pear, yellow skin; flesh is buttery, melting, and very juicy; excellent dessert variety; good for export.

Howell — Fruit large, light waxen yellow; heavy bearer, following "Williams' Bon Chretien"; a first-class market pear, and should be largely grown.

Josephine de Malines—Medium size, roundish, oblong, skin greenish yellow, flesh very juicy, melting, and richly flavoured; a good bearer and long keeper. Winter.

Keiffer's—A first-class variety, medium size, pineapple flavour, strong grower, very prolific; second best for canning. Late.

Packham's Triumph—Raised by Mr. Packham, Molong, New South Wales; beautiful shape, large, good flavour; early and good cropper; ripe in April; good shipper. One of the best.

Williams' Bon Chretien (Bartlett) — Commonly called "Duchess" in this State; fruit large, skin clear yellow, sometimes tinged red, flesh melting, buttery, with a powerful musky aroma; the best of its season. Early.

QUINCES

Champion — A splendid American variety; fruit very large, flesh tender; the latest keeping variety.

Missouri Mammoth—Extra large fruit of excellent flavour; sturdy grower; prolific and early.

Master's Early—Fruit large and good, roundish, skin golden yellow. A very handsome quince.

Pineapple — Fruit medium size, clear golden yellow; makes a superior jelly, and is said to cook as tender in five minutes as the best cooking apple; possessing a most exquisite and delicious flavour.

Smyrna—The tree is a rapid, strong grower, and immensely prolific; commences to bear the second year from the bud; the fruit is very large and of a lovely yellow-lemon colour, presenting a fine appearance; the flesh when cooked is very tender, having a delicious flavour. Ripens in April, and will keep till September.

CITRUS FRUITS

From 3/6 each; 36/- dozen; per hundred on application, for well-grown, healthy trees, carefully balled.

MANDARINS

Beauty of Glen Retreat—Very handsome, good flavour; very productive tree.

Emperor—Largest of fruit, very juicy; an excellent market kind. Good bearer. Particularly good.

Thorny—An enormous cropper of medium size; juicy and sweet flavoured.

Dancy's—Medium size, flat, almost scarlet; excellent quality; vigorous grower.

Canton—Large and prolific; fine flavour.

Nobilis—Medium size, flat, solid. Good.

Our Seed Department at your service.

ORANGES

Ruby Blood—High quality of flavour; pulp a deep red when ripe.

Compuda—Large, oval-shaped fruit, of first-class quality; a regular and consistent bearer.

Mediterranean Sweet—Medium to large; oval, nearly seedless, thin skin, excellent flavour; ripens late, begins to bear early; requires protection from cold winds.

Parramatta—Fruit large and juicy; strong grower; good bearer.

St. Michael—Large, thin-skinned fruit, very few seeds; good bearer.

Siletta—Skin pale yellow, flavour good. One of the hardiest and best.

Valencia Late—Medium in size, round, skin smooth and thin. It does not ripen until late in spring, and it is valued on that account.

Valencia Late Improved. (Special Berri variety) — A vast improvement on the old variety "Valencia Late". It has a thin skin, few pips and fine flavour; does not revert to the green stage, nor does it become puffy through hanging on the tree. Fruit is of superior quality and can be marketed to end of March. Price, 5/- each.

Washington Navel—Fruit very large, seedless, pulp juicy and well flavoured; strong grower and good bearer.

CITRUS

Bengal Citron—Very large fruit, used for candied peel. 5/- each.

Cumquat—Small, round, bright fruits; used mainly for ornamental trees. 5/- each.

Pomelow (Grape Fruit) — Marsh's Seedless—Fruit medium sized, with thin skin, practically seedless. 3/6 each.

Lemon Lisbon—The best variety for general use. 3/6 each; 36/- dozen.

Seedless Lisbon Lemon — A fine variety, seedless and good flavour. 5/- each.

Poorman—Fine large fruit, used for marmalade and candied peel. 3/6 each.

VINES

Extra Strong Plants, 9d. each;
7/6 dozen.

Black Frontignac—Very rich vinous flavour; small; early.

Black Hamburg—Thin skin, rich and juicy.

Black Prince—Very fine oval, black; rich, juicy, and sugary.

Black Muscat (Mrs. Pince's)—Bunches large, tapering berries, medium, oval, skin purplish-black. Late.

Crystal—Bunch large, berries medium to large, skin white; one of the best. Medium.

Doradilla—Bunch large and closely set, berries medium to large, amber; a tremendous bearer and a good late packing grape.

Grand Turk—Large bunches, berries black; ripens soon after mid-season, but will keep for a considerable time on the vine if kept dry.

Green's Early — Berries and bunch medium, skin greenish white; sets well, ripens very early.

Gros Colman—Bunches very large; berries large and round, skin dark purple or black, flesh juicy and sweet.

Lady's Finger — Bunches medium to large; loose berries, long and tapering at both ends, skins greenish, becoming quite pink when ripe. Late.

Malaga (Black)—Bunch large, berries medium oval; skin tough, hangs late and carries well.

Malaga (Red)—Bunch large, berries large, roundish oval, skin red or reddish-purple when fully ripe.

Mrs. Pince's Black Muscatel—Black. Late.

Muscat Gordo Blanco (Muscatel)—Bunch large, berries large, pale amber; a good bearer and the best for drying.

Muscat Hamburg — Berries medium, oval, dark reddish purple, becoming black when fully ripe.

Red Muscat (Woods)—This is a sport from the well-known "Muscat Gordo Blanco," but the berries are of a beautiful red colour.

Red Prince—Bunches very large, berries large, round, of a deep red colour, becoming almost purple when fully ripe; flesh sweet, firm, and of fairly good flavour. Medium to late.

Bulbs of Every Variety in Stock.

Sultana — Bunches medium size and long, berries oval; skin pale yellow, flesh without seeds. Valuable for home use when dried.

Sweetwater — Bunches medium size, berries round, greenish white; an old favourite. Early.

Waltham Cross—Bunches very large, long, and tapering, skin pale amber, flesh firm and solid, with a brisk, pleasant flavour; one of the largest grapes in cultivation; good market or packing.

White Frontignac — Very rich, fine flavour; straw colour.

Wortley Hall—Bunch and berry very large, berries round, black; generally bears a heavy second crop, which are useful for making jelly.

Zante Currant—This is the Currant of Commerce, and is being extensively planted in this State for drying purposes; black, juicy, and sweet berries.

All the Vines this season are remarkably strong, well-rooted plants. Those who are wanting quantities should inspect our plants before ordering elsewhere.

MISCELLANEOUS FRUITS

Bananas—3/6 each. Special plants, 5/- each.

Blackberries—9d. each; 7/6 dozen.

Cape Gooseberry—9d. each; 7/6 dozen. Seedlings, in Spring, 1/- dozen.

Currants (Red, Black, and White)—1/- each; 10/- dozen.

Chestnuts (Spanish)—3/6 each.

Gooseberries—Leading varieties, 9d. each; 7/6 dozen.

Guava (Purple)—1/6 each.

Loganberry—1/- each; 10/- dozen. Stronger, in pots, 1/6 each; 15/- dozen.

Passion Fruit—9d. each; 8/- dozen.

Mammoth, 1/6; **Banana**, 1/6 each.

Persimmon—3/6 each.

Pomegranate—2/6 each.

Raspberry—9d. each; 7/6 dozen.

Rhubarb (of sorts) — 9d. each; 7/6 dozen. Mould's Crimson Winter, 1/6 each.

Strawberry (Gandy, Melba) — 9d. dozen; 5/- 100. Illawarra, 1/6 dozen; 10/- 100. New Giant, 1/6 dozen; 10/- 100.

Walnuts—From 3/6 each.

Walnut (Wilson's Wonder)—The best soft-shell walnut, crops well. 7/6 each.

Hardy Ornamental Trees and Shrubs

This section represents a great variety of plants suitable for almost any kind of horticultural ornamentation. The heights given are approximate to ultimate growth, but vary according to soil and situation. They can all be kept within bounds by careful pruning, which we recommend being done just after flowering. We shall at all times be pleased to recommend varieties for any special purpose, and when large numbers are wanted will make special offers.

E. signifies Evergreen. D. signifies Deciduous.

		Height in feet.	Price.
E.	Abelia rupestris —Rose and white	3	1 6
E.	Abutilon (Chinese Lantern)—Of sorts	—	1 6
E.	Acacia Baileyana — Commonly known as Cootamundra Wattle, silver leaved	15	1 6
„	dealbata (Silver Wattle)	20	1 6
„	decurrens (Black Wattle)	20	1 6
„	longifolia —Canary yellow	10	1 6
„	mollissima —Yellow	20	1 6
„	normalis (Queen Wattle)—A very pretty variety, producing masses of beautiful large deep yellow blossoms	20	1 6

We invite you to Inspect our Nurseries.

		Height in feet.	Price.
E.	<i>Acacia podalyriaefolia</i> (Queensland Wattle) — Silvery foliage and large deep yellow flowers; one of the very best	12	2 0
	„ <i>Pycnantha</i> (Golden Wattle)	15	1 6
E.	<i>Agathœa coelestis</i> (Blue Marguerite)	2	1 6
E.	<i>Ageratum Mexicanum</i> —Blue	3	1 0
D.	<i>Aloysia citriodora</i> (Lemon-scented Verbena)	6	1 6
D.	<i>Amygdalus</i> —Mellor Park Crimson, early-flowering, bright crimson	—	2 0
	„ <i>persica</i> (Double-flowering Peach) — Double white, double rose, double crimson, double pink	12	2 0
	„ <i>Pollardi</i> (Flowering Almond)—Single, rose pink	10	2 0
E.	<i>Arbutus unedo</i> (Irish Strawberry Tree)—Beautiful shrub; flowers somewhat resemble the Lily of the Valley; scarlet berries which resemble the strawberry	18	2 0
E.	<i>Arduina bispinosa grandiflora</i> (Cape Plum)—Hardy, sweet-scented, white flowering shrub	6	1 6
E.	<i>Acuba japonica aurea variegata</i> — Leaves spotted and blotched with gold	4	2 6
D.	<i>Azalia Indica</i> —We have a very choice collection of these handsome flowering shrubs. They require to be grown in cool, moisture-holding soil. From 2/6.		
E.	<i>Barleria cristata</i> —Light mauve	4	1 6
E.	<i>Berberis Darwini</i> — Produces a rich profusion of deep orange-coloured flowers	5	2 0
	„ <i>pruinosa</i> —Dark green foliage, with silvery white berries	6	2 0
	„ <i>subcauliata</i> —Bright pink berries	4	2 0
	„ <i>Wilsonae</i> —Pale yellow, berries coral	5	1 6
	„ <i>Sargentiana</i> —A hardy evergreen shrub of 6 feet, with large elegant dark green leaves, turning bronze and scarlet in autumn and winter; pale yellow flowers, followed by black attractive fruit; large spines	—	3 0
	„ <i>Thunbergia atro-purpurea</i> —Purplish-red foliage. We recommend this as a perfect gem amongst dwarf shrubs	—	2 6
E.	<i>Boronia elatior</i> —A very bushy variety, with rosy-red flowers	—	2 6
	„ <i>megastigma</i> —Copper colour; produces a profusion of beautifully scented flowers	3	3 0
E.	<i>Bougainvillea Glabra Cypheri</i> —Magenta, very large flowers	—	1 6
	„ <i>Glabra Sanderiana</i> —Magenta; very hardy	—	1 6
	These varieties of the Bougainvillea make magnificent shrubs if planted against a 6 ft. or 8 ft. stake, and the long shoots trimmed in.		
D.	<i>Bouvardia</i> —In varieties, comprising all the best	—	2 0
E.	<i>Brachychiton acerifolium</i> (Flame Tree)—Handsome evergreen trees, with attractive foliage and masses of flame scarlet flowers	30	2 0
E.	<i>Browallia Jamesoni</i> —A handsome shrub, producing an abundance of orange flowers	6	1 6
E.	<i>Brugmansia Knighti</i> (Trumpet Flower)—Large, trumpet-shaped, pendulous white flowers, strongly scented	8	1 6
	„ <i>sanguinea</i> —Red and orange	5	2 6
E.	<i>Buddlea Colvillei</i> —Very free-flowering, rosy red shade of flowers	6	2 6

That Birthday Present! Give Plants or Ferns.

E.	<i>Eriostemon neriifolium</i> (Native Wax Flower)—A beautiful shrub with long spikes of star-shaped white flowers	3	2 6
E.	<i>Escallonia macrantha</i> —Red	4	1 6
	<i>montevidensis</i> —White	6	1 6
E.	<i>Eucalyptus</i> (Gum Tree) <i>botryoides</i> —Fast growing; tinted foliage	80	1 0
	<i>Caesia</i> — A beautiful rose-pink flowering variety. Dwarf in habit, very attractive. A real good garden variety that will become very popular	—	2 0
	<i>calophylla</i> —Large white flowers	20	1 6
	<i>calophylla rosea</i> —Large rose flowers	12	1 6
	<i>citriodora</i> (Lemon-scented Gum)	40	1 6
	<i>corynocalyx</i> (Sugar Gum)—9/- dozen; 60/- 100	80	1 0
	<i>cornuta</i> (Yate Gum)—White, 9/- dozen; 60/- 100	60	1 0
	<i>ficifolia</i> (Scarlet Flowering Gum)—This is one of the most beautiful of the flowering gums, and when in bloom presents a most glorious display	15	1 6
	<i>globulus</i> (Tasmanian Blue Gum)	200	1 0
	<i>gomphocephala</i> (Tooart Gum)—A very handsome tree. Quicker growing on some soils than the Sugar Gum, and is being planted extensively. 9/- dozen; 60/- 100	100	1 0
	<i>leucoxydon</i> (South Australian Blue Gum)	80	1 0
	<i>maculata</i> —One of the best timber trees. 9/- dozen	—	1 0
	<i>Nutans</i> —Flowers very freely, the blooms being a bright red	6	2 0
	<i>rostrata</i> (South Australian Red Gum)	100	1 0
	<i>Stricklandi</i> —A fine flowering gum, growing to about 15 ft., giving brilliant yellow flowers	15	1 6
	<i>torquata</i> —A graceful and charming gum that gives salmon-pink blossoms on slender growths. Commences to flower in October and remains in bloom for some time	15	1 6

PLANT SHADE TREES ON THE FARM

Many farms in Australia are practically treeless. Trees should be a prominent feature on all farms to add to the appearance, beautify the homestead, and to afford shade for the stock. Tree planting may be undertaken on the outskirts of the area and in corners of paddocks.

To afford an effective shelter for stock the trees should not be over-tall. Close planting will bring this about. Trees put in close will supply excellent straight timber for posts, but the foliage required as a break-wind will be furnished at too high an altitude to be effective. Sugar Gums to provide effective shelter for stock should be planted at least 30 feet apart, and Aleppo pines 30 to 33 feet. Closer planting is, of course, recommended for timber purposes. We can supply the right trees for all districts at reasonable rates.

Wreaths and Bouquets supplied on Shortest Notice.

	Height in feet.	Price.
E. <i>Eugenia Kingi</i> —White; very handsome berries	12	2 0
E. <i>Eupatorium Wienmannianum</i> —A valuable garden shrub; flowers in the winter, useful for cutting	6	1 6
E. <i>Euonymus Japonicus</i> —Large growing variety	10	1 6
„ <i>Japonicus albus latifolius elegans</i> —Upright variety; variegated with gold	8	1 6
„ <i>Japonicus aurea variegata</i> — Foliage variegated green and gold	8	1 6

„ <i>Multijuga</i> —Long racemes of lavender flowers	2 6
„ <i>Sinensis fl. pl.</i> —Double lavender	2 6

Palms

Chamærops excelsa (Windmill or Fan Palm)—Well shaped growth, very hardy. From 2/6.

Chamærops humilis — Dwarf habit, good shape. From 2/6.

Corypha australis—Very hardy, fan-shaped leaves. From 2/6.

Cotton Palms—From 2/6.

Kentia Balmoreaana—Very graceful, largely used for table decoration. From 1/6 each.

Kentia Fosteriana — Tall, elegant palm; the best of all palms for table or indoor decoration. From 1/6 each.

Phoenix reclinata — Hardy, dark green feathery foliage. From 2/6.

Phoenix Canariensis — Very handsome dark green leaves, similar to the Date Palm, but more graceful; one of the best palms for outside planting. From 2/6 each.

Phoenix Roebelini — A charming palm for indoor decoration. From 5/- each.

Hedge Plants

Carob (*Ceratonia Tiliqua*) — This makes a magnificent evergreen hedge, and is very hardy. Plant 4 to 5 ft. apart. 2/- each; 20/- dozen.

Ceanothus divaricatus — When well clipped this makes one of the most ornamental hedges. It bears large quantities of blue flowers, which make it very effective. Plant 3 ft. apart. In pots, 20/- per dozen.

Coprosma Lucida—Makes one of the handsomest hedges, its bright leaves being always shining green, not holding the dust; quick growing and hardy. Strong plants, in pots, 10/- per dozen; 70/- per 100. Open roots out of seed beds, 4/- dozen; 25/- 100. Plants in pots

are strongly recommended, as twelve months can be saved.

Cupressus Torulosa—A very pretty, compact growing plant that makes an ideal hedge where space is limited, and also for dwarf heights than that given by *Lambertiana Horizontalis*. It requires less trimming and is well recommended. Strong plants in 4-inch pots, 20/- dozen; 5-inch pots, 2/6 each; 25/- dozen; 6-inch pots, 3/6 each; 35/- dozen.

Cupressus Lambertiana Horizontalis —One of the most beautiful hedges in cultivation. It is very hardy and immune from disease. The main stem (or leader) of each plant should be tied to a stake when planting, and allowed to grow to within six inches of the ultimate height of the hedge before it is clipped. Plant 4 to 5 ft. apart. The general planting size has been those in 5-inch pots, at 30/- dozen.

Cupressus Lambertiana Horizontalis Aurea—A beautiful golden variety. Fine plants, 2/6 each. Special extra sized plants, in 6-inch pots, 4/- each; in 7-inch pots, 7/6 each.

Cupressus Macrocarpa — Makes a very good, compact hedge. Price 1/6 each; 15/- dozen. Larger plants, in 5-inch pots, at 2/6 each; 20/- dozen.

Duranta Plumieri—A neat-growing evergreen plant, bearing clusters of purplish blue flowers, 1/6 each; 15/- dozen.

Duranta Ellisii—This particular variety of *Duranta* is specially recommended. It is a remarkably quick grower if given right soil conditions and attention to watering, and is free from thorns. *Duranta Ellisii* is one of the finest shrubs in cultivation. 1/6 each; 15/- dozen.

Kaffir Apple — 3/6 dozen; 20/- per 100.

Our Roses are Noted for their Beauty.

Laurustinus — Very useful for a small hedge. Plant 2 ft. apart. 1/6 each; 15/- dozen.

Plumbago Capensis—This makes a very showy and pretty flowering hedge, blue flowers; also can be had in white. Plant 2 ft. apart. 1/6 each; 15/- dozen.

PRIVET—Golden Variegated Privet —This most beautiful Privet, with its fine richly variegated gold foliage, makes a most striking and handsome hedge; it is dense in habit of growth and it does not die out. The plants remain wonderfully healthy. Plant 2 ft. apart. Plants in pots, 1/6 each; 15/- per dozen.

Spartium Junceum (Yellow Broom) —Will make a fine ornamental hedge if kept well trimmed. In pots, 15/- per dozen.

Rosemarinus (Rosemary)—From cuttings, well rooted, 25/- per 100.

Lonicera nitida makes an ideal dwarf hedge, small box-like foliage, borne on dense twiggy growth, stands clipping well. Plant 2 ft. apart. 15/- dozen.

Myoporum insulare (native Myrtle) —This makes a splendid hedge, quick growing, and clean. Does well near the sea. Plant 3 ft. apart. 15/- dozen.

Privet—Evergreen; open rooted. 20/- 100; 3/6 dozen.

Tagasaste (Tree Lucerne) — 2/6 dozen; 15/- per 100.

Tecoma Capensis—A fine red flower-hedge, very hardy. 1/6 each; 15/- dozen.

Wormwood (Artemesia)—A nice silvery foliage, very useful for shelter for poultry. 1/6 each; 15/- dozen.

Grow Trees for Timber

It is generally recognised that vegetation has a great influence over rainfall. For that reason the planting of trees in quantity on farms and stations should be considered. Apart from the question of rainfall, the growing of trees for timber should be undertaken, particularly in the light of a threatened timber shortage.

Tree planting should be made in wide belts and in compact blocks rather than in single rows along fences, because when closely planted they grow straighter and better timber is obtained. Plant closely and afterwards thin out the trees to obtain posts and other useful timber.

Sugar Gums, Tooart Gums, Red Gums, Tasmanian Blue Gums, and others are useful, as are also the Pines—Halepensis (Aleppo Pine) and Insignis (The Remarkable Pine).

We can supply these and others in large lots at specially reduced rates. Get Lasscock's quotations.
